

System solutions

# Commercial buildings

# Your strong partner!

Commercial buildings are subject to special requirements in terms of sound levels, air volumes or the arrangement of unit components. Units not only have to work properly, they also have to look good and deliver a healthy indoor climate. Take advantage of our individual solutions and our decades of experience.

# Open-plan versus single offices

The requirements relating to the HVAC design of commercial buildings vary depending on the size of the space and the number of staff. You will find the perfect system for every space with our flexible equipment.

# Off when no one is there

KaControl enables you to have pleasant energy-saving temperatures within defined time periods. These centrally set periods can be individually modified. That way the operation of your system responds to actual demand.

# Change of tenant? Not a problem!

Tenants and requirements change from time to time in commercial buildings. Our HVAC systems adapt flexibly too the building design and different types of use and are therefore perfect for this kind of building.

# Your one-stop service:

Don't waste time coordinating different trades. Kampmann is your qualified partner for all cross-trade systems. We will coordinate every solution precisely to your requirements.

# Space-saving

The available space has to be utilised as efficiently as possible when designing commercial buildings. Our HVAC systems can be flexibly adapted to the design of the building and do not take up unnecessary space.

- ① Venkon
- ② KaCool D
- ③ Airblock KG
- ④ KaDeck
- ⑤ PowerKon + F
- ⑥ Door air curtains
- ⑦ Katherm trench systems
- ⑧ Entrance mats
- ⑨ KaClima
- ⑩ Kavent BA

### Applications

- Offices
- Meeting and conference rooms
- Entrance foyers

### Functions

- Heating
- Cooling
- Ventilation

# Perfect reception areas

## Door air curtains

- ▶ for controlled screening of open doorways, for example with Tandem door air curtains or UniLine Cassette door air curtains
- ▶ Tandem technology for up to 38 % energy savings
- ▶ pays for itself in under a year, unlike conventional door air curtains
- ▶ heating with water or refrigerant
- ▶ up to a height of 4.0 metres
- ▶ comprehensive range to meet different requirements

# Ultra economical

... with decentralised fresh air supply

- ▶ the decentralised façade ventilation system Kavent BA for heating, cooling and ventilation
- ▶ fresh air enters via the shortest route through the façade
- ▶ modular design for seamless progress on site
- ▶ EC radial fan for fresh air operation with constant volumetric flow control
- ▶ additional cross-flow fan for secondary air mode
